Set A:

    Praise:

- Landing Header with image and navigation bar looks good and works well together
- Good choice of typeface

    Criticism:

- Text on the homepage feels bulky
- Large patch really only works on the home page and feels out of place in other pages

Set B:

    Praise:

- Text is well balanced with images especially in the mobile view!

    Criticism:

- Landing page feels a little bland. I would love to see more happening.
- Clppng next to the image that says clppng feels a bit repetitive/unnecessary

Overall:

- I would love to see an accent color that associates with the colored image OR just black and white across the entire website
- Navigation bar wording is great
- I enjoyed the choice of images!
- One suggestion is embedding a music player
